*\*LabSmart Services is looking at running additional programs in 2024. We are currently well into developing a HILF (AS 1289.5.7.1) program for May, with further plans for 'Nuclear Gauge' and 'UCS' (AS 5101.4). However, other programs may be offered where laboratories have expressed a particular interest. If you would like to express interest in anything discussed here, please contact LabSmart Services. An updated schedule will be released once an official timeline is set for the new programs.*

*\*\*Programs may be cancelled where there is insufficient interest in a program or other factors beyond LabSmart Service's control.*
