

Concrete (125)- October 2024

Proficiency Testing Program

Please Note

In recent years we have seen an increase in the number of participants in our concrete programs. This has been great to see; however, there are limits to the number of cylinders LabSmart can produce for a single program (without compromising the quality of our samples). Due to this factor, we are currently limiting the number of participants for this program to around 50. This is not a hard limit; it could be more or less depending on the quality of the finished concrete.

To counter this, we have started running more concrete programs within the year, and depending on demand for this program, we could run two or more groupings.

We fully intend to accept all participants that apply to this program. However, for various reasons (including the ones listed above), we may need to roll some participants into our next Concrete Proficiency Program. To make your transition seamless, the 'Order Form' will ask you to confirm that (if needed) you would like to be automatically rolled into our next scheduled concrete program (the next expected concrete program would be around April 2025). If this were to happen, you would be notified, and you will have your price locked into the price listed on your order form.

Kind Regards

Jeffrey Mulholland
LabSmart Services (General Manager)

Proficiency Testing Program – "Single Site" Order Form

Concrete – Compressive strength & Mass per unit volume - 2024(125)

Please email to info@labsmartservices.com.au

Please PRINT company representative contact details:-

Organisation:		Address:	
NATA Ac. No.		(Postal)	
Contact:			
Phone:		Mobile:	
Email:			

Note: Postal address must be *Australia Post* recognised

I would like to request participation in this proficiency program and by signing the authorization below agree to LabSmart Services proficiency testing program terms and conditions (see www.labsmart.com.au for details) and the payment of the prescribed fees.
